

NEURSANTYS

Enhancing, Preserving, Restoring,
BALANCE

Neursantys is pioneering the development of non-invasive bioelectronic medical devices to diagnose and treat balance impairments and related neurological conditions caused by aging, trauma, and disease.

NEURVESTA™

- Non-invasive bioelectronic restoration of disrupted balance functions
- Proprietary neuroplastic treatment protocol
- More active and independent living for older populations

UNMET CLINICAL NEED

- Age related balance decline affects 35% of U.S. adults aged 40 years and older
- A primary cause of balance decline is age-related changes in the vestibular balance system

OUR SOLUTION

- Easy to use wearable device
- Seamless clinical workflow integration
- Delivered by minimally trained staff
- Flexible sales and support
